

POSITION GATE

4

Safe Automation!

POSITION GATE: linear absolute encoder integrated inside the rod cover of hydraulic motors. Available for all:

MINI TANK and HALF TANK (optional)
 HALF TANK 24V(standard) and connected with **IP 67 connectors.**

The POSITION GATE helps to find the exact position of the moving leaf with a linear precision comparable to the hundredth of a degree.

ADVANTAGES:

-  Feedback on leaf opening and closing speed control
-  Reverse on obstacle on AC operators
-  Memorized leaf position in case of power failure or in case of manual release without losing the position at the first opening.
-  Exact slowdown or stop points.
-  Easier match of the impact curve in accordance with Machine Directive 2006/42 / EC.

IP67 Connectors

The POSITION GATE may be applied also on previous versions
