

GATE 2 DG

Control unit for two motors digital programming

- ▶ Encoder/Amperometric sensitivity adjustment (for electromechanical operators)
- ▶ Automatic logic (6 modes), half-automatic (6 modes), dead-man, open and close logic
- ▶ Adjustable slowdown in opening and closing for each leaf and direction
- ▶ Adjustable motor torque for each leaf and direction
- ▶ Working times self-learning
- ▶ Photocells self-test
- ▶ Self-diagnostics
- ▶ Settable photocells inputs
- ▶ Adjustable courtesy light output up to 4 minutes
- ▶ Adjustable pedestrian opening
- ▶ Electro-lock management
- ▶ Led warning lamp
- ▶ Extractable terminals
- ▶ Connector for RF radio receiver plug-in
- ▶ Programming through JOLLY 3 palm also
- ▶ Working time adjustable for each leaf and for opening and closing
- ▶ Number of performances for assistance
- ▶ PUSH-OVER function management with optional periodical push over
- ▶ 24V Aux output management
- ▶ Safety edge management in opening and closing
- ▶ Optional external module for traffic light management
- ▶ Management of photocells 10K

...and many other functions
