

USER 1 24V DG

24V low voltage for sliding gates and barriers
Digital programming

- ▶ Management of one 24V motor
- ▶ Adjustable slowdown in opening and closing
- ▶ Motor speed adjustment
- ▶ Adjustable pedestrian opening
- ▶ 24V Led warning lamp
- ▶ Emergency battery management through optional battery charging card
- ▶ Connector for RF radio receiver plug-in
- ▶ Working times self-learning
- ▶ Simplified programming through buttons and display
- ▶ Programming through JOLLY 3 palm also
- ▶ Adjustable amperometric type inversion on obstacle
- ▶ Photocells self-test
- ▶ Balanced or standard safety edge management
- ▶ Extractable terminals
- ▶ Separate torque adjustment for opening and closing
- ▶ Slowdown speed adjustment
- ▶ Automatic, security and step by step type 1, step by step type 2, 2 buttons, dead-man logics
- ▶ Motor inversion and limit switch (right/left hand mounting)
- ▶ Automatic closing setting
- ▶ Start in pause setting
- ▶ Prepared for Master/Slave function
- ▶ Low consumption in standby-by
- ▶ Adjustable courtesy light output up to 4 minutes
- ▶ Setting number of cycles for assistance
- ▶ Settable photocell inputs

...and many other functions
