

Automatic Gate Openers

COMPANY PROFILE

The Company

SEA works in the field of automations for 30 years and is one of the few companies on the market able to offer both hydraulic and electromechanical products with industry-leading quality standards. The key factors that differentiated SEA from its competitors have always been:

- Trade policy directed exclusively to distributors, specialized installers and professionals.
- Own production "MADE IN ITALY".
- Flexibility to realize solutions satisfying special customers' requirements, as for example hydraulic slowdown, or variation of the technical specifications compared to the production standards.
- Certified products according to the EN 12543, EN 12445 European rules and the UL 325 American rules, which only few companies have obtained.

HEADQUARTER - SEA S.p.A.

70.000 sqf covered area

OUR MOST IMPORTANT GOALS

1991

*First factory
of 3000m²*

*Standard of
hydraulic
production*

1993

*Establishment of
a commercial
branch SEA
France (Lyons)*

*Company Quality
certification,
ISO9001*

*Product
certification
GHOST-R for
Russian market*

2000

*Second plant
for assembly
and warehouse*

2002

*UL 325 Certification
for United States of
America*

*New warehouse
SEA France*

2003

*SEA DOUBLES !
Hydraulic production line,
which soon becomes
the core business of the
company
Start electromechanical line*

*Production of hydraulic
bollards for the management
of car parks and public areas*

2008

*Third processing /
commercial plant, with a
showroom of 500 m²
The company's
production area
exceeds 11.0000m².
Opening of the
commercial branch in
Miami SEA (USA)*

2011

*THE Green
Economy:
1,5 million
euros invested
in the construction
of over 2000 solar
panels supplying
the energy needs
of the company*

2012

*SEA srl
becomes
SEA S.p.A.*

2018

*Opening
branch
SEA FRANCE
in Lyon
France*

2019

*BRUSHLESS
Line Operators
Investments in
INDUSTRY 4.0*

2022

*30 th
Anniversary of activity*

*Internal laboratory recognized by
CSA Group Testing as an authorized
laboratory for technical tests and
certifications of products and
compliance with UL 325 requirements
(for USA and Canada Market) and
100% Made in Italy Certification*

GREEN FACTORY

The choice to invest in the sun

In May 2010 was inaugurated the solar system of over 2000 photovoltaic panels installed on the roofs of the establishments supplying the energy needs of the company and providing additional economic benefits in selling the produced energy to the local electricity provider.

The network produces electricity from the sun in a silent and environment- friendly way, thanks to the system of fully integrated photovoltaic panel
